Intella®

Vound

Connect
Administrator

Level: Advanced

This Vound training course is designed for administrators who want to advance their knowledge and skills with the administrative side of Intella Connect. The course will prepare you to effectively implement, configure and maintain an Intella Connect platform. The course consists of 5 Modules which cover technical considerations, installing Connect and Node, configuration settings, and user management with roles and permissions.

Process. Search. Filter. Produce. Simple.
