FACT SHEET

Who | What | Where | When. Simple.

A fast, powerful, and simple to use tool for data review and investigation of computer forensic images and evidence.

Key Features

- Extremely user-friendly interface which allows the user to quickly find, and investigate the information which is relevant to the case.

- Blistering-fast indexing speeds that allow access to the indexed data in the shortest time possible.

- Automatic extraction of notable registry artifacts. This can save the examiner many hours of manual artefacts extraction and data conversion to human readable format.

- Search and preview system settings, browser history, device usage, email, attachments, iTunes backups, archives, headers, documents, embedded images, and metadata.

- Index forensic image files S01/E01/Ex01/L01/Lx01/ AD1/ISO and DD and FTK images. Support for Windows and MacOS file systems, GPT and MBR partitions, ISO and others.

- Multiple search visualization options. These include:
  - **W4's unique Timeline** – allows the user to select a date range but also understand how much data is in that range.
  - **Events view** – allows the user to visually see in chronological order every event in order.
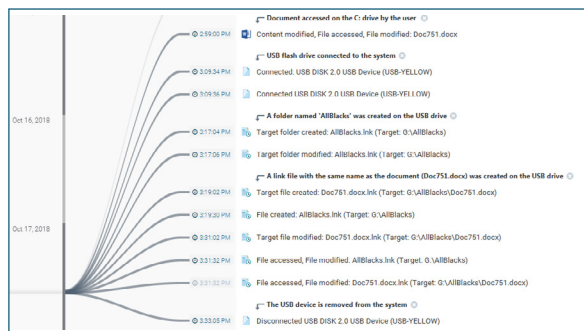

- **Links graph** – this view uses item metadata to link items together to highlight the ownership of data, and what accounts or devices had access to the data.
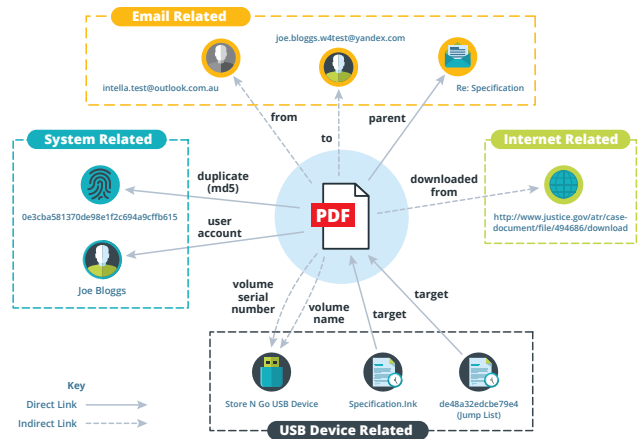

- Fully customizable reporting wizard for reporting relevant artefacts in the case ready for Court, or for your client.

- W4 cases can be directly ingested and integrated into Intella to expand on analysis and reporting.

- 24/7 support via our support portal.

- Exceptional value – fully featured software at a fraction of the cost of similar products.
